

acoustiguide Smart Solutions

The Onsite Hardware to Complement Your Content & Apps

Our goal is the same as yours: a fully enhanced visitor experience.

You already have the robust app and interactive content. Acoustiguide Smart Solutions allows you to provide a complete guided package by ensuring your hardware and apps are always ready to go. With Acoustiguide's technology, you can directly control the quality of the users' visits and app experiences.

To allow site operators to benefit from a complete hardware system, Acoustiguide Smart Solutions offers a 25-unit Wireless Charging Cabinet; customizable, branded portable case; optional anti-theft system; and headset.

The **Wireless Charging Cabinet** supports multiple commercial and Opus proprietary devices, reduces maintenance and replacement costs, and extends battery life by eliminating overcharging.

- Supports 25 assorted devices, including Opus, iPod Touch and HTC
- Interchangeable nests for different device
- Stackable
- Visual confirmation of charging in progress
- Easily detachable locking door
- Dimensions: W 625mm/24.61" x H 426mm/16.77" x D 288mm/11.34"

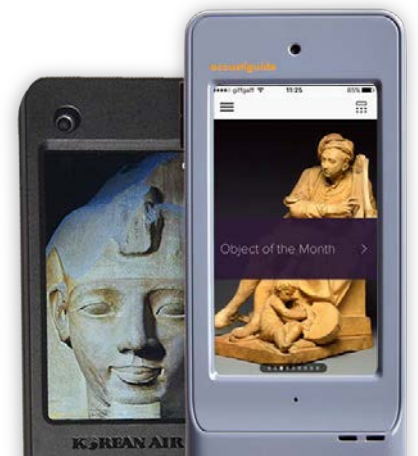

Acoustiguide's **customizable case** maximizes visitor engagement by ensuring access only to your app's content.

- Feature your logo or exhibit to reinforce your brand
- Rugged design
- Ergonomic
- Adjustable neck strap

Acoustiguide **headsets** reinforce visitor focus
